Our Services

We Care About How You Look ...

1. Spa Pedicure \$28.00

Sit on roller massage chair while soaking your feet in a pedicure foot bath. Begins with your toe nails being cut & filed. Then the cuticles are pushed and trimmed. Your feet is then scrubbed with callus remover and massaged with moisturizing lotion. Finally with a choice of polish for a finished presentation.

2. Deluxe Pedicure \$35.00

Same as regular pedicure but additional treatments for your feet. Beginning with sea salt soak in foot bath then with sugar scrub which is massaged into your feet to revitalize the skin.

Follow with the foot mask wrapped with hot towels to restore lost nutrients, which skin-regenerating ingredients to rejuvenate, brighten, and leave skin looking soft, glowing, and youthful. You can feel the difference right the way. Then a choice of lotion of your theme with balance of vitamins, nutrients and essential oils that leaves your leg and feet feeling fresh and smooth.

3..Full Hot Stone Pedicure \$45.00

Hot Stones are a great treatment; Stones provide great heat retaining and energizing properties. Our Hot Stone Pedicure features the use of heated stones, essential oils and callus smoothing. Our professional nail technicians use advanced massage techniques on legs and feet that work in harmony and create gentle touches to ease tension. Hot stones will relax the muscles and joints and relieve your tension, as warm, smooth stones become an extension of our Therapist's hands. The healing energy penetrates your muscles. Warm towels are then applied to your feet to stimulate circulation, soften skin, and relieve your achy tired feet.

4. Jelly Pedicure \$50.00

This is truly a unique spa experience. A gel forms when the powdered jelly is added to the water and it becomes a translucent fluffy jelly. Jelly Pedi provides the ultimate relief for stress and aching muscles. It helps exfoliate as well as hydrate dry skin. While soaking your feet in jelly we also cover your legs with foot mask wrapped with hot towels to restore lost nutrients, which skin-regenerating ingredients to rejuvenate, brighten, and leave skin looking soft, glowing, and youthful.

5. Milk & Honey Pedicure \$55.00

Take a journey to an extraordinary level of luxury to bring you to a sense of well being. The milk and honey combination will smooth, moisturize and rejuvenate tired feet. While soaking your feet in warm milk we cover your legs with honey foot mask wrapped with hot towels. The lactic acid & vitamin E in the milk will soften the rough spots while the natural honey adds moisture and vital nutrients to the skin leaving it soft and hydrated. A gentle exfoliant is then applied to smooth the skin, followed by a milk and honey butter to complete this truly relaxing experience.

What is gel manicure?

Gel Manicure (or SHELLAC) is a true innovation in chip-free, extended-wear color. If you have problem with nail polish to stay on or chip with your natural nails, Gel Manicure is the product. It applies like polish, wear like gel and off in minutes. Light in weight and glossy are other characteristics to get the color gel nail. Gel Manicure is last up to 2 weeks or more... amazing!

What is SNS?

SNS nails — otherwise known as a “dip powder” — are made with a powder and glue, and the combo creates a long-lasting bond on your nails. SNS Nails invented dipping powders to give women beautiful and healthy nails. Enjoy maximum beauty without harm to health.
